

I would never have considered getting satellite radio for my car and home if New York would just have a country music station. After losing our one and only station and having to deal with music only from the internet, I had enough. My entire family purchased satellite radios for our cars and use at home so that we can have non-stop country music. Not only is the service great, but it is commerical free. All the stations offered on satellite radio are absolutely great and you don't have to deal with people like Howard Stern and obnoxious DJ's.

Please reject NAB's petition 04-160 and support satellite radio's (XM Radio) ability to provide the kind of programming that I demand and deserve. I pay for this service versus free nonsense radio stations which have way too many commercials and DJ's which I can do without.

Thank you for your support.
